

Job Title	Full Stack Developer
Reports To	Manager / team Leader

Who Are We?

Founded in 1994, our mission @ Information Systems Limited is to provide the most comprehensive, cost effective and innovative business software solutions through a cooperation of expertise and knowledge.

We are committed to deliver the highest level of value to our customers and to provide a dynamic and challenging environment for all our employees. The group now employs over 65 professionals, and services over 600 customers both locally and overseas and is ISO 9001:2015 certified.

Job Purpose

- Designing and developing software solutions to meet business requirements.
- Managing full software development life cycle including testing, implementation, and auditing.

Duties & Responsibilities

- Performing solution design, bug verification, and beta support, which may require research and analysis.
- Maintaining quality and ensuring responsiveness of applications.
- Executing, assessing, and troubleshooting software programs and applications. Analyzing and amend software errors in a timely and accurate fashion and participate in software upgrades and revisions.
- Understanding and implementation of security and data protection.
- Translating high-level requirements into detailed designs, and technical estimates
- Guiding developers on issues related to the design, development, and deployment of mission-critical information and software systems; review work of development teams.
- Proficiency with Git, or comparable distributed version control system
- Solving complex problems; taking a new perspective using existing solutions

Qualifications & Skills.

- Requires in-depth knowledge and experience.
- Ambitious, creative and innovative.
- Insanely curious and energetic about the future of the web.
- Works independently; receives minimal guidance.
- Acts as a resource for colleagues with less experience.
- Often leads the work of project teams; may formally train junior staff.
- Works independently.
- Hardworking, ability to consistently deliver technology projects on time, on budget with high quality results and satisfied clients.
- Ability to juggle multiple projects/clients simultaneously.
- Demonstrates accountability; owns outcomes and results, prioritizes tasks, and consistently meets deadlines.
- Ability to work with minimal supervision. Equally skilled at working collaboratively in a team-oriented environment.

Qualifications & Skills (Continued)

- **Proficiency:**
 - C#,
 - ASP.NET Core,
 - LinQ,
 - Lambda Syntax,
 - MS SQL / MySQL / NoSQL
 - JavaScript (Angular, JQuery, Bootstrap),
 - HTML,
 - CSS,
 - xml,
 - json

Working Conditions

- At times the nature of the job may be somewhat demanding.

Physical Requirements

- Since the job consists of office related work, there are no particular physical requirements.

Direct Reports

- Anyone the company may deem appropriate.

Other Requirements:

- On the job training would be provided as and when required.
- Training may be carried out internally, locally, or overseas.
- Ongoing training and a structured appraisal system ensure people can grow professionally.
- We offer careers not jobs.
- The opportunity to learn the business processes involved.
- Salary will commensurate with experience, expertise and knowledge.
