

EasyAI

The author-first AI for e-learning that actually works.

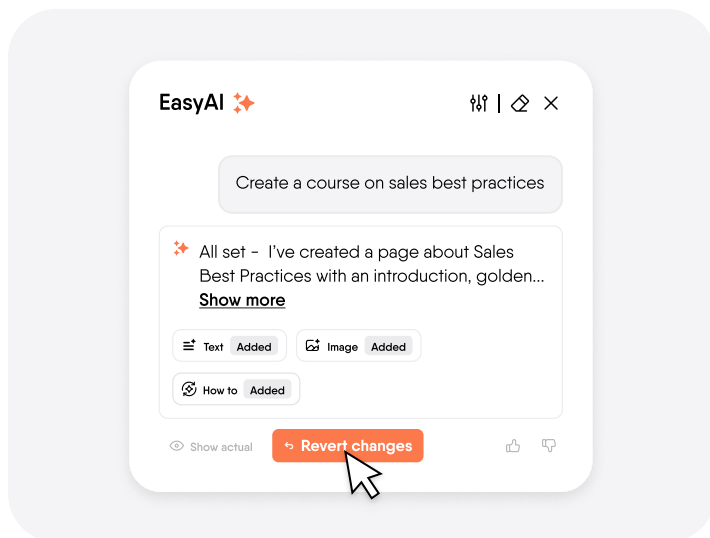

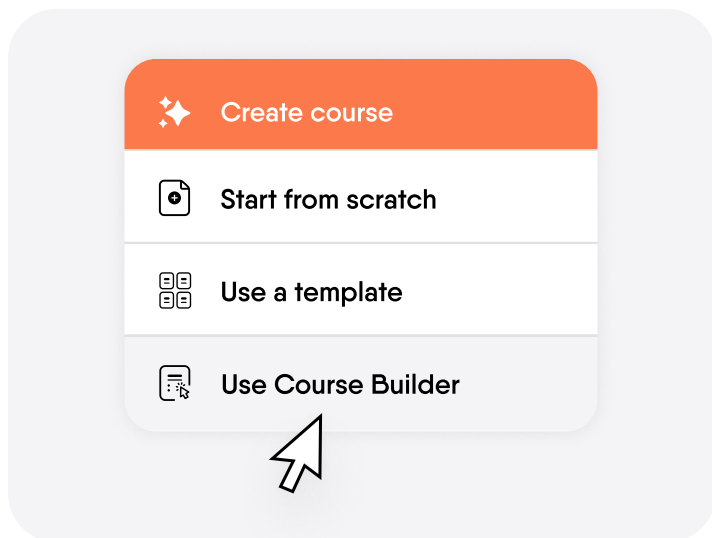

Every AI authoring tool makes the same promise. Generate a course in minutes. What they don't tell you: a prompt can't capture your organization's tone, your learners' context, or the subject-matter expertise that makes training stick. So you get a generic draft. And then the real work starts.

We built something different.

AI that doesn't leave you with hours of editing

Fast, precise, contextual – Human-centric AI for better course creation

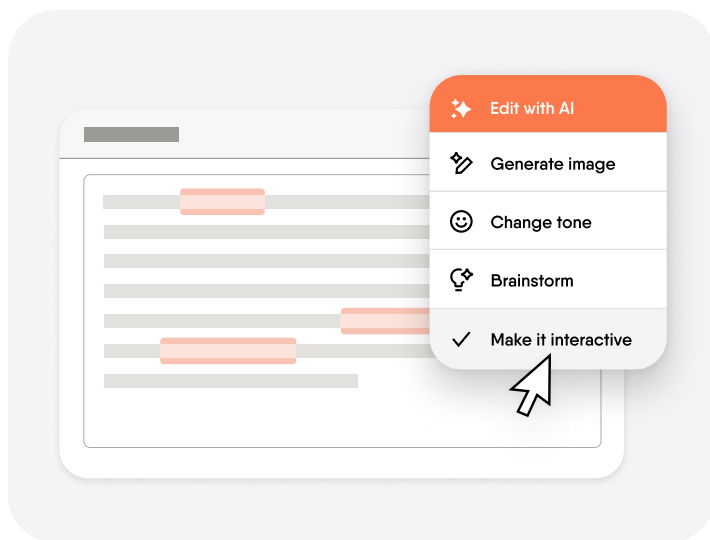

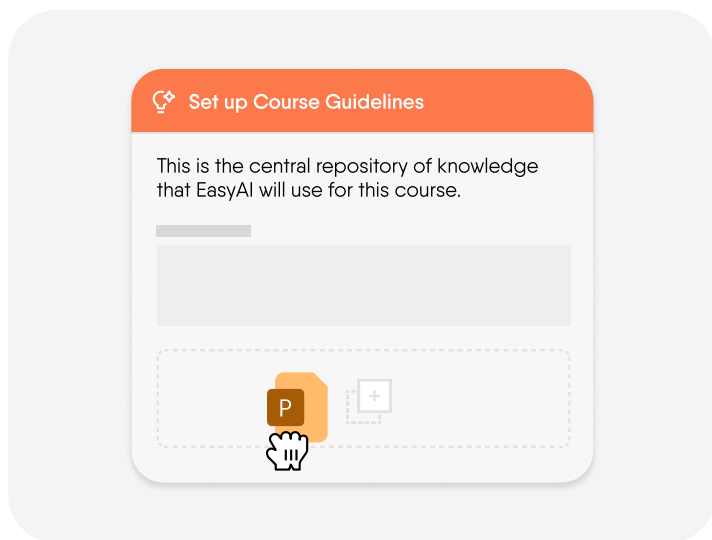

Document to course

Upload PDFs, PPTs, or Word files—
EasyAI instantly turns them into structured
courses.

AI Agent

Create and refine your entire course
through conversation, with didactic best
practices applied automatically.

Course guidelines

Add your brand guidelines, tone of voice,
and source materials to get AI output that
fits your expectations.

Interactivity

Add flip cards, quizzes, scenarios, and
contextual images to any block. No design
skills needed.

How Sodexo used Easygenerator to create training 22x faster while cutting the costs to create

Since adopting Easygenerator, the global L&D team at Sodexo no longer needs to decline requests for local training materials. Regional teams at Sodexo have been able to build learning modules 22 times faster than using instructional designers and 42 times cheaper on Easygenerator. With such savings, Marion and her team have saved both time and money to add value elsewhere in the company.
