

SkillChoice® IT

A robust collection of IT learning assets

SkillChoice® IT provides access to many of Skillsoft's IT learning assets and solutions in a convenient and cost-effective bundle.

SkillChoice IT offers a vast array of learning options with instant access to thousands of learning assets across a wide choice of modalities: videos, courses, books, assessments, mentoring and more. These learning assets can be used to solve an immediate technical problem, to build a well-rounded set of IT skills and to prepare for certification exams.

All of the learning offerings in SkillChoice IT are developed by highly-credentialed subject matter experts who work closely with our learning design professionals. Most courses are presented by these experts to whom IT professionals can easily relate. SkillChoice IT is also a great resource for the mobile learner, as much of the learning content is available via mobile devices. As a result, SkillChoice IT is a powerful tool that supports continuous learning in the workplace and on-the-road.

A robust collection of IT learning assets that support continuous learning for today's technology professionals.

SkillChoice IT supports beginners to advanced practitioners, and covers the latest and emerging technologies, the most popular IT topics, as well as legacy platforms and applications. SkillChoice IT provides access to over 2,000+ courses designed by Skillssoft's experienced subject matter experts and course designers. For informal learning and performance support, SkillChoice IT includes the searchable full-text of thousands of leading IT books from today's leading IT publishers. For those employees who are working on certifications, SkillChoice IT provides a wide array of certification test preparation assets and tools— including TestPreps and access to a highly-credentialed team of mentors.

Skillssoft's IT content is available via Skillssoft and SumTotal platforms as well as third-party platforms.

The SkillChoice IT collection includes award winning content across a wide array of subject areas including:

- Cloud Computing and Virtualization
- Data and Databases
- Enterprise Resource Planning (ERP)
